1. On 22 November 1950, a radar set was observed on Apollons Hill west of Attenberg (F 52/6 37). The set was located about 20 meters northwest of a wooden town about 20 meters high which marked a triangulation point. *During the two-hour period of observation the two rods fitted on the roctangular frame were pointing toward the northwest. 2. According to local residents, the crow assigned to the radar set occupied three small wooden sheds on the southern slope of the hill. They also said that the construction of a bunker for quarters was planned. Are lines leading to the crest of the hill were not noticed.* Example 1 Commont. For location and sketch of the radar set, see Annex. Commont. The radar set near Wittenberg was reported for the first time. It is believed to be operated by the fighter corps headquarters in Wittenberg. The presence of such a radar set in or near Mittenberg has been summised for a long time, because all fighter divisions, and the fighter corps headquarters in Wittstock, are equipped with such a set.
